

**IN THE SPECIFICATIONS**

On page 1, before line 3, please add the following new heading:

**CROSSED-REFERENCE TO RELATED APPLICATIONS**

On page 1, before line 15, please add the following new heading:

**BACKGROUND OF THE INVENTION**

On page 2, before line 8, please add the following new heading:

**DESCRIPTION OF THE PRIOR ART**

On page 2, before line 22, please add the following new heading:

**BRIEF DESCRIPTION OF THE DRAWINGS**

Please amend the paragraph beginning on page 2, line 22 as follows:

The invention will now be explained in the light of the attached drawings and more specifically:

- figure 1 schematically representing an embodiment of the invention;
- figure 2 representing a practical implementation of this embodiment;
- figure 3 representing a detailed view of a circuit of figure 3.2.

On page 2, before line 28, please add the following new heading:

**DETAILED DESCRIPTION OF THE INVENTION**

Please amend the paragraph beginning on page 3, line 20 as follows:

When the television receiver is switched off, a signal SH is sent by a microprocessor 11 of the receiver for contacting a switch K connected between the comparator input and the ground. The comparator input is then connected to the ground, thus simulating an absence of gross signal Y'. As a consequence, there is a boost in the error signal E, thus in the amplification by amplifier 22 and in the end in the luminance signal Y.
